During the SAEF1 period, DOES focused on developing non-traditional apprenticeship programs in high-growth fields, modernizing the apprenticeship registration process, and focusing on special population-focused pre-apprenticeship programs. These initiatives have laid a strong foundation for expanding apprenticeship opportunities and are on track to meet key performance indicators, including program completion and apprenticeship placement. With SAEF2, DOES aims to build upon this success, targeting an increase in total participants served, those entering and completing Registered Apprenticeship Programs, and further development of pre-apprenticeship and apprenticeship programs. The strategic approach emphasizes sustainability, inclusivity, and the expansion of apprenticeship opportunities to meet the evolving needs of the District's workforce and economy.

Subrecipient Roles: List all subrecipients and the roles (activities) they will fill on the proposed project. Roles should be aligned to proposed workplan.

Upon grant award, DOES will fund existing youth apprenticeship programs through established MOUs. These entities will be responsible for delivering pre-apprenticeship training to participants that result in a nationally recognized credential and places successful completers into an apprenticeship program. DOES will also execute a new MOU to establish new apprenticeship programs housed with the Department of General Services.

## List of credential(s) to be awarded:

Pre-apprenticeship and apprenticeship programs created under the initiative will be required to connect participants to nationally recognized industry credentials. Specific credentials are to be determined once the grant project commences.
